

# A consultancy service and IT project booster

We are a versatile IT consultancy service and resource provider offering expertise in finance, health, heavy industry, and the society sectors. Our team of experts boosts existing projects and suppliers with a combination of on-premise and remote resources, providing flexible and customized solutions for your business needs by supporting and helping organizations achieve their IT goals and objectives.

We are dedicated to delivering high-quality services tailored to our client's needs, ensuring they receive innovative, cost-effective, and timely solutions at the right price at the right time!

# Finance industry

In the eFinance industry, our consultancy and IT services can help financial organizations to improve their customer experience, operational efficiency, and regulatory compliance.

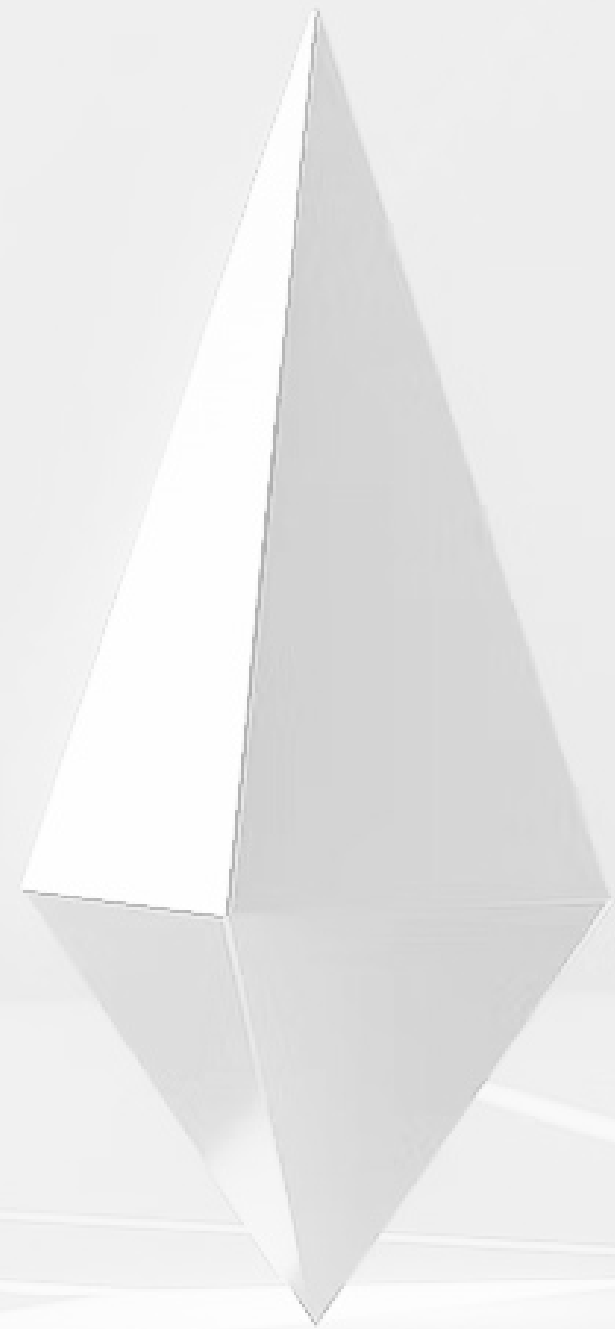

We can assist in the development of digital banking solutions, payment systems, and risk management systems that enable organizations to meet the needs of their customers and comply with regulations.

Our team has expertise in implementing cybersecurity measures to protect financial data and prevent fraud. Our services can help financial organizations to increase their revenue, reduce costs, and stay competitive in a rapidly changing industry.

# Our focus on the finance industry

We have helped financial institutions and fintech companies to develop and implement secure and reliable digital solutions that streamline financial transactions, enhance customer experience, and improve risk management.

We have also designed and implemented data analytics systems that provide real-time insights into customer behavior, enabling financial institutions to make better-informed decisions and improve the overall quality of their services.

Our experience in eFinance has allowed us to gain a deep understanding of the complex regulatory and technological landscape in this industry, and we are committed to using our expertise to help our clients navigate this landscape and achieve their business objectives.

# Services we provide

## Frontend

UXUI / Design  
Concepts  
Project Management

Hosting  
Backup

## Administrative Services

Translation, market research, copy writing

## Backend

Backend Development  
System Architecture

## Project Management

Co-ordinating remote resources  
Agile PM  
Portfolia MNG

# Case Study

We helped a fintech startup to develop a mobile payment platform that allowed users to send and receive money securely and conveniently. The platform was designed to be easy to use and integrate with other financial services, such as credit cards and bank accounts. As a result of the new platform, the startup was able to attract a large user base and secure partnerships with major financial institutions, leading to significant growth in their business.
