Boozter Network

A consultancy service and IT project booster

We are a versatile IT consultancy service and resource provider offering expertise in finance, health, heavy industry, and the society sectors. Our team of experts boosts existing projects and suppliers with a combination of on-premise and remote resources, providing flexible and customized solutions for your business needs by supporting and helping organizations achieve their IT goals and objectives.

We are dedicated to delivering high-quality services tailored to our client's needs, ensuring they receive innovative, cost-effective, and timely solutions at the right price at the right time!

Health industry

In the eHealth industry, our consultancy and IT services can help healthcare providers and organizations to improve the quality, efficiency, and accessibility of healthcare.

We can assist in the development of electronic health records, patient portals, telemedicine solutions, and other healthcare IT systems that enhance the patient experience and enable better communication and collaboration among healthcare professionals.
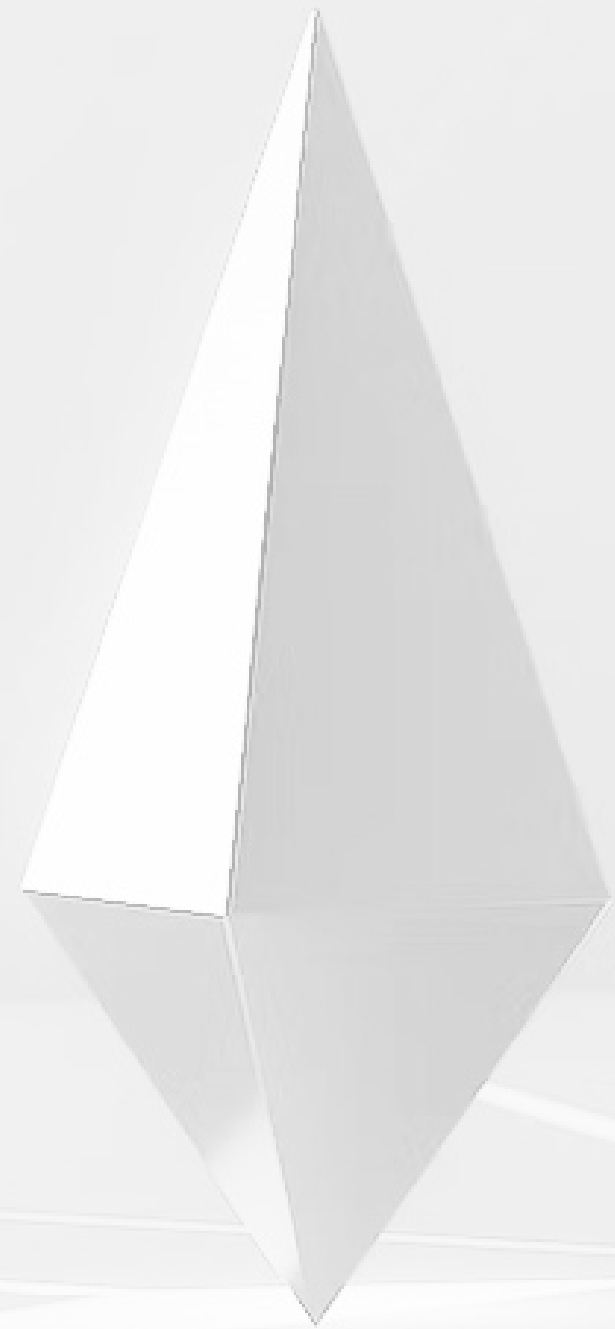

Our team has expertise in implementing healthcare data security and privacy measures to protect patient information and ensure regulatory compliance.

Our services can help healthcare providers to reduce costs, improve patient outcomes, and provide better healthcare services to the community.

Our focus on the health industry

We have worked with healthcare providers and technology companies to develop telemedicine solutions, electronic health records systems, and patient engagement platforms that improve patient outcomes and enhance the delivery of healthcare services.

We have also helped to design and implement health monitoring and analytics systems that provide real-time data insights to healthcare providers, enabling them to make better-informed decisions and improve the quality of care.

Our experience in eHealth has allowed us to gain a deep understanding of the unique challenges and opportunities in this industry, and we are committed to using our expertise to help our clients succeed.

Services we provide

Frontend

UXUI / Design
Concepts
Project Management
App Developent
Web Development

Backend

Backend Development
System Architecture

Infrastructure & Hosting

Cloud Native
Kubernets / Terraform
Surevision
Hosting
Backup

Project Management

Co-ordinating remote resources
Agile PM
Portfolia MNG

Administrative Services

Translation, market research, copy writing

Case Study
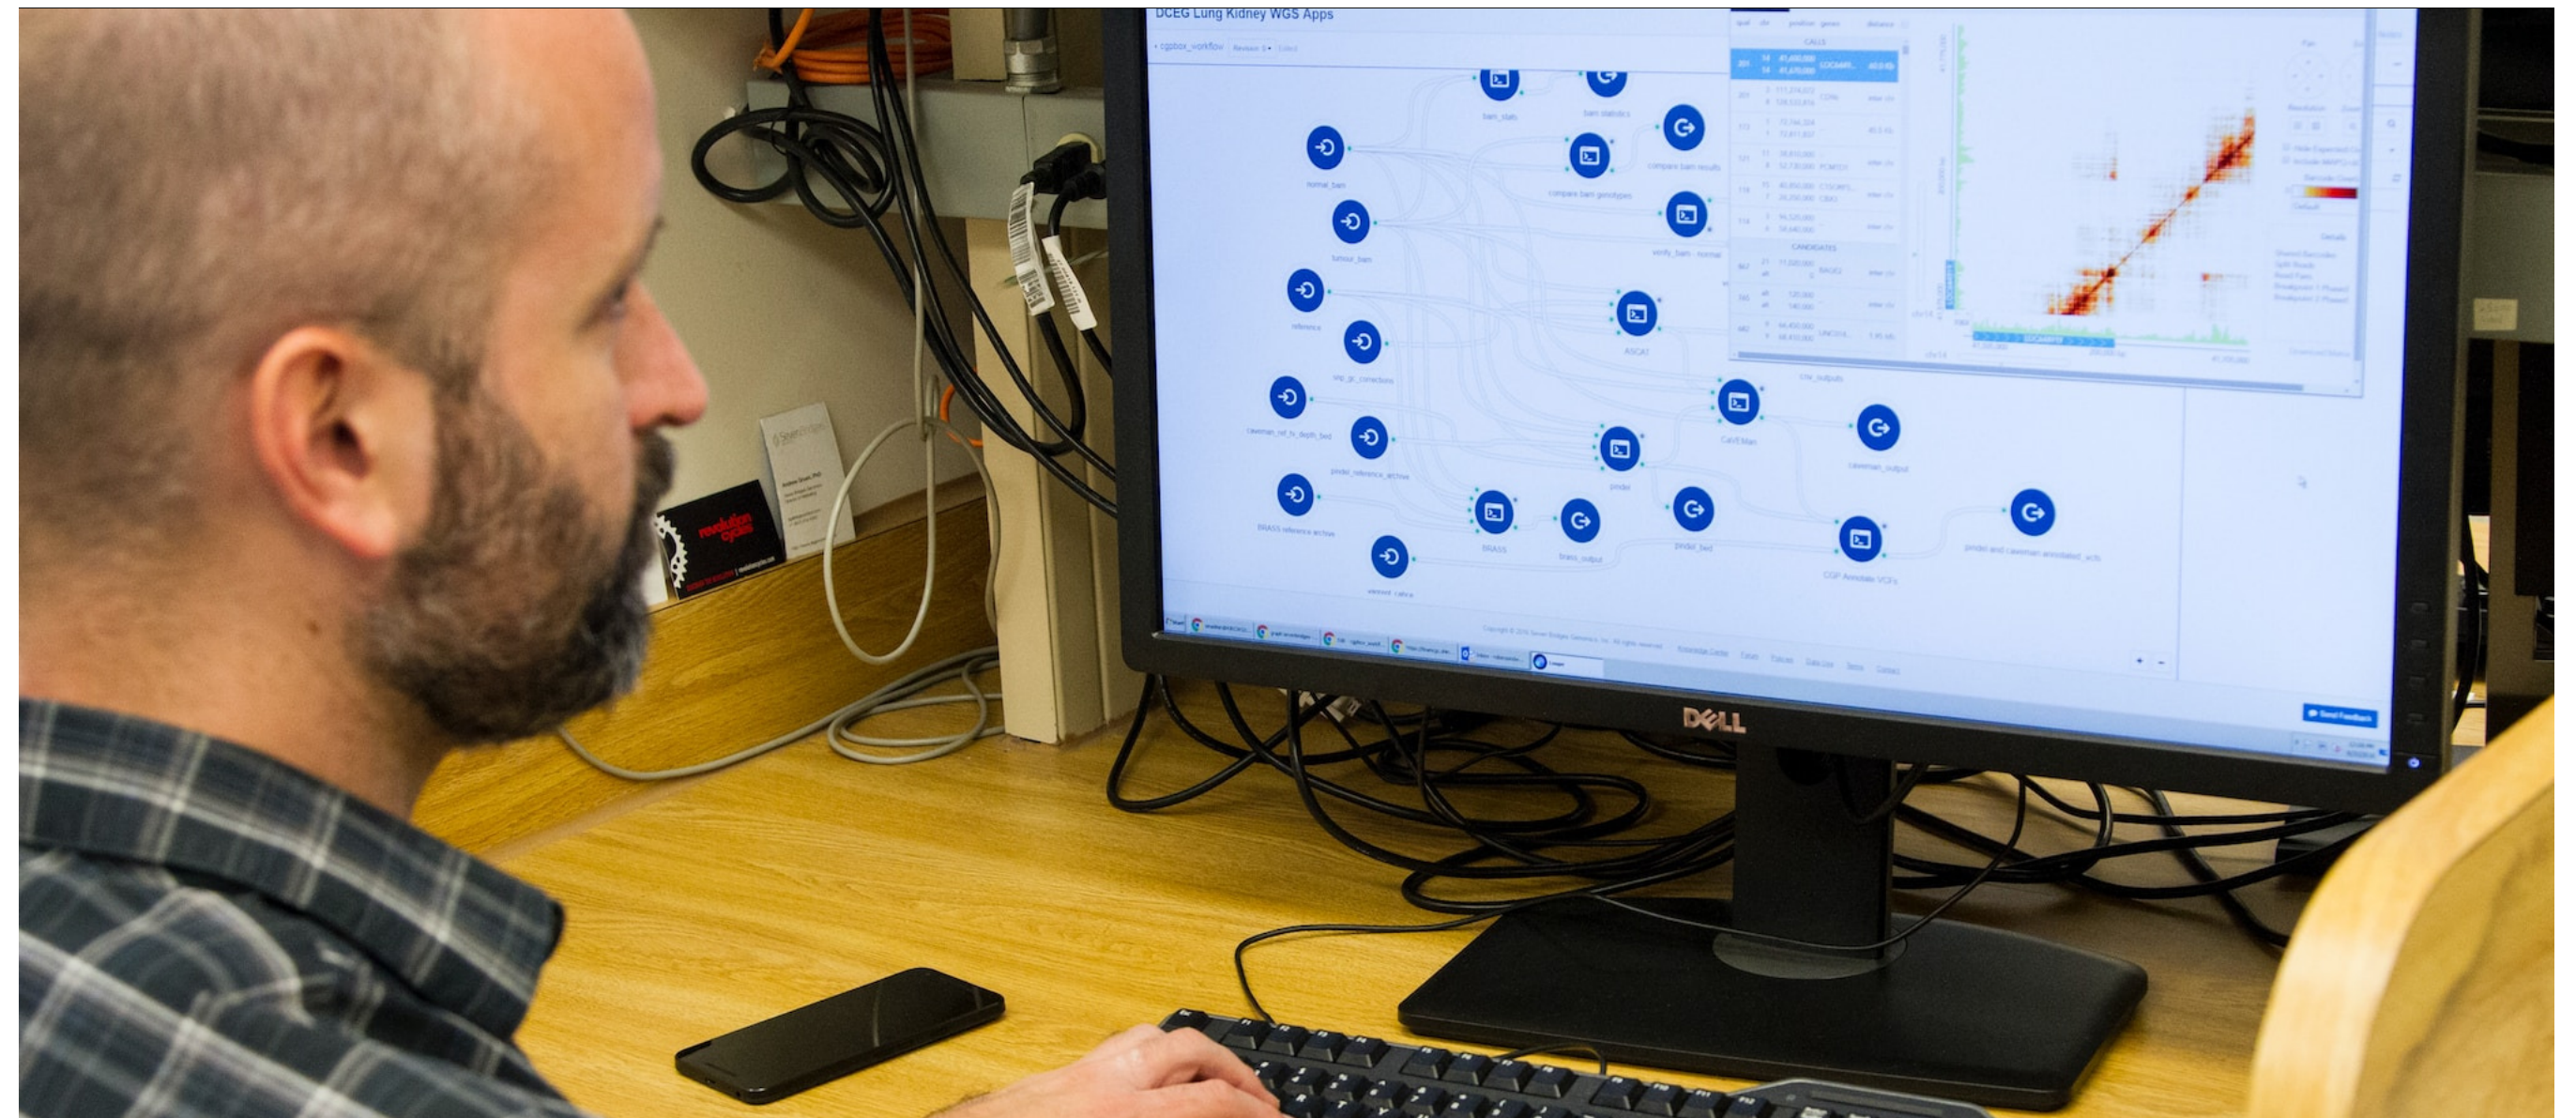

We worked with a large healthcare provider to develop a telemedicine platform that allowed patients to schedule virtual appointments with their healthcare providers. The platform was integrated with the provider's electronic health records system, allowing providers to access patient information in real-time during the virtual appointment. As a result of the new platform, the provider was able to offer more flexible and convenient care to their patients, while also reducing wait times and improving overall patient satisfaction.
