

A consultancy service and IT project booster

We are a versatile IT consultancy service and resource provider offering expertise in finance, health, heavy industry, and the society sectors. Our team of experts boosts existing projects and suppliers with a combination of on-premise and remote resources, providing flexible and customized solutions for your business needs by supporting and helping organizations achieve their IT goals and objectives.

We are dedicated to delivering high-quality services tailored to our client's needs, ensuring they receive innovative, cost-effective, and timely solutions at the right price at the right time!

Production & manufacturing industry

In the eIndustry industry, our consultancy and IT services can help manufacturing and industrial organizations to improve efficiency, productivity, and competitiveness.

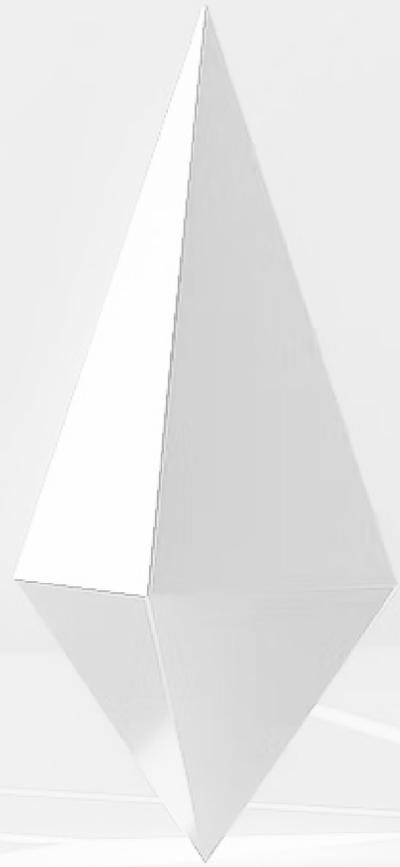

We can assist in the development of smart factory solutions, industrial automation systems, and supply chain management systems that enable organizations to optimize their operations and reduce costs.

Our team has expertise in implementing IoT and AI technologies to enable real-time data monitoring, predictive maintenance, and quality control.

Our services can help organizations to stay ahead of the competition and meet the challenges of Industry 4.0.

Our focus on the industry

We have worked with manufacturing and industrial companies to develop custom software solutions that optimize production processes, improve supply chain management, and enhance overall business efficiency.

We have also designed and implemented IoT systems that enable companies to collect real-time data from their equipment and machinery, providing insights into performance and enabling predictive maintenance.

Our experience in the industry has allowed us to gain a deep understanding of the unique challenges and opportunities in this industry, and we are committed to using our expertise to help our clients achieve operational excellence and drive business growth.

Services we provide

Frontend

UXUI / Design
Concepts
Project Management
App Development
Web Development

Infrastructure & Hosting

Cloud Native
Kubernetes / Terraform
Surevision
Hosting
Backup

Administrative Services

Translation, market research, copy writing

Backend

Backend Development
System Architecture

Project Management

Co-ordinating remote resources
Agile PM
Portfolio MNG

Case Study

We worked with a manufacturing company to develop a custom software solution that enabled them to track the performance of their production lines in real-time. The system was integrated with sensors and IoT devices throughout the factory, providing real-time data on equipment performance, energy consumption, and other key metrics. As a result of the new system, the company was able to optimize their production processes, reduce downtime, and improve overall efficiency.
