Boozter Network

A consultancy service and IT project booster

We are a versatile IT consultancy service and resource provider offering expertise in finance, health, heavy industry, and the society sectors. Our team of experts boosts existing projects and suppliers with a combination of on-premise and remote resources, providing flexible and customized solutions for your business needs by supporting and helping organizations achieve their IT goals and objectives.

We are dedicated to delivering high-quality services tailored to our client's needs, ensuring they receive innovative, cost-effective, and timely solutions at the right price at the right time!

The society

In the eSociety industry, our consultancy and IT services can help public sector organizations to improve citizen services, transparency, and accountability.
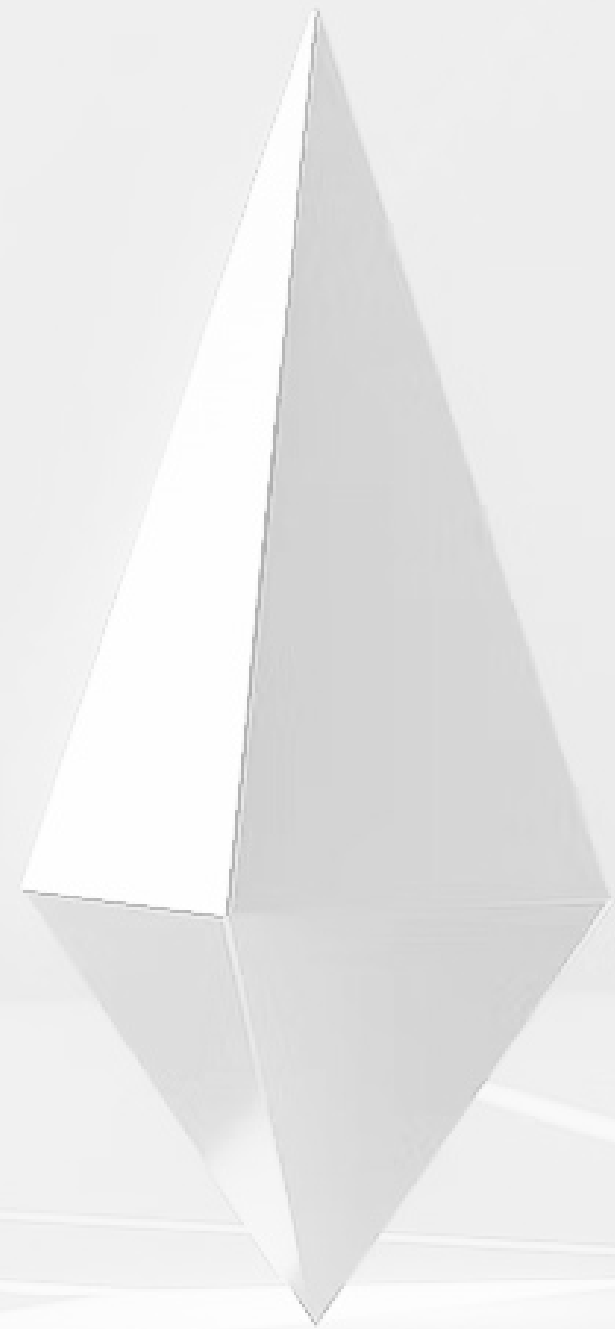

We can assist in the development of digital solutions for e-governance, e-democracy, and e-participation, enabling citizens to access information, interact with government officials, and participate in decision-making processes.

Our services can also help public sector organizations to modernize their IT infrastructure, improve data management, and enhance cybersecurity measures.

We are committed to delivering solutions that are user-friendly, accessible, and meet the needs of the citizens.

Our focus on the society

We have helped organizations and governments to build and manage online communities, social media platforms, and e-government solutions that enhance citizen engagement and promote social inclusion.

We have also designed and implemented virtual event management systems that enable organizations to host large-scale events and conferences online, providing a seamless and engaging experience for attendees.

Our experience in eSociety has allowed us to develop a keen understanding of the importance of technology in building strong and vibrant communities, and we are committed to helping our clients harness the power of digital solutions to achieve their social and civic goals.

Backup

Project Management

Co-ordinating remote resources
Agile PM
Portfolia MNG

Administrative Services

Translation, market research, copy writing

Case Study

We helped a non-profit organization to build an online community platform that allowed members to connect with each other, share resources, and organize events. The platform was designed to be user-friendly and accessible, with features such as discussion forums, event calendars, and member directories. As a result of the new platform, the organization was able to build a stronger sense of community among its members, and was able to more effectively organize events and share information.
